

Massachusetts COVID-19 Vaccine for Individuals Ages 65 and Older

Beginning February 18, 2021, people ages 65 and older are eligible to receive the COVID-19 vaccine in Massachusetts. The COVID-19 vaccine is safe and free.

When can I get vaccinated?

Vaccinations for people ages 65 or older will begin on February 18, 2021 and continue throughout the remainder of the winter and into the spring and summer. Appointment scheduling for these individuals will be available starting 18, 2021.

The current COVID-19 vaccines require two doses. You will not be fully vaccinated until you receive both doses, and both doses should be administered at the same site.

Eligibility

People ages 65 and older are eligible for the vaccine beginning on February 18, 2021. **Please note, due to high demand and limited supply, it may take several weeks to get an appointment at a location near you.** As more vaccine supply arrives in Massachusetts, additional appointments will become available

How do I book an appointment?

Appointments can be scheduled online by visiting vaxfinder.mass.gov. Individuals can enter their ZIP Code or City/Town name to find an appointment online. While there is extremely high demand for appointments and limited vaccine supply, new appointments will continually be added to the website regularly and the mass vaccination sites have the most availability for appointments. As of now, mass vaccination sites post appointments weekly, on Thursday, and some smaller sites, such as CVS, post more regularly. If you are unable to secure an appointment, please continue to check the website.

Steps to book an appointment:

1. Visit vaxfinder.mass.gov
2. enter their ZIP Code or City/Town to identify a location
3. Have your important information with you, such as your insurance card
4. Fill out the self-attestation form through the appointment booking process

Locations to Get Vaccinated

There are several locations where individuals who are ages 65 or older may receive vaccinations. Because vaccine supply is limited, **you may need to wait several weeks to schedule an appointment.** Please visit the Commonwealth's [webpage with vaccination sites](#) for the current list of open sites, including:

1. **Mass vaccination sites**, such as Gillette Stadium, Fenway Park, the Eastfield Mall in Springfield, the DoubleTree Hilton Hotel in Danvers, the Natick Mall and the former Circuit City in Dartmouth;
2. Regional **vaccine clinics** operated by a local board of health;
3. **Over 100 Local pharmacies** and retail locations administering the vaccine; or
4. **Your housing property**. If you live in [public or private affordable low income senior housing](#) there may be an onsite clinic being planned, check with your management company..

Please note that this list will be updated frequently as new sites come on line. **All mass vaccination locations are wheelchair accessible and do not require consumers to use stairs.** Many of the locations have a drop off area for people who may benefit from walking shorter distances and people will not be waiting in line outside. Some locations may also provide mobility assistance. **Language translation services are available for all mass vaccination locations** and many other vaccination locations. Please review the specific vaccination location details to determine whether this is an appropriate fit for your accessibility needs.

Assistance Scheduling an Appointment

Individuals who are **unable to use or have difficulty accessing the internet** to schedule an appointment online may use the **Massachusetts Vaccine Scheduling Resource Line**:

Call 2-1-1 (877-211-6277) and follow prompts for assistance booking an appointment

Hours of Operation:

Monday through Thursday from 8:30 AM to 8:00 PM

Friday through Sunday from 8:30 AM to 5:00 PM

The Massachusetts Vaccine Scheduling Resource Line is available in English and Spanish and will have translators available to support residents in approximately 100 additional languages. Individuals will be able to speak to a representative live on the phone to assist them with an appointment through the state's online system. **These representatives have the same access to appointments as on the public website; it will not give individuals access to additional appointments.** If no appointments are available, callers will have the option to be placed on a call back list for the mass vaccination sites. The caller will receive a call back when an appointment becomes available for them at a mass vaccination site, and the list will be called on a first-come, first-served basis.

Some additional resources that may be able to assist you include, but are not limited to, the following local organizations:

- [Local Council on Aging or Senior Center](#)
- [Regional Aging Services Access Points \(ASAP\)](#)

For individuals who are unable to leave their home for a medical appointment without an ambulance or two-people assisting them, the Commonwealth is committed to ensuring that all eligible for a vaccine are able to access it. Additional information regarding vaccination options for these individuals will be released shortly. Some people may be able to receive the vaccine if they live at an [eligible affordable senior housing property](#), where an on-location clinic may be planned.

Eligibility Criteria

When scheduling your appointment or at the time of the appointment, you will be required to review the eligibility criteria and confirm you are eligible to receive the vaccine. The attestation will be done verbally over the phone, verbally or in writing at the vaccination site, or online if using an online appointment scheduling tool. You can also follow online instructions and complete the [COVID-19 Massachusetts Vaccination Attestation Form available on the mass.gov website](#).

You can receive the vaccine even if you do not have health insurance, an SSN, or a photo ID. However, if you have any of this information or documentation, please bring it with you.

You will never be asked for a credit card number or any other form of payment for the vaccine.

COVID-19 Vaccine Importance and Safety

The COVID-19 vaccines are safe. The available COVID-19 vaccines are approved and recommended by the FDA and the CDC's Advisory Committee on Immunization Practices following standard testing and approval processes. Vaccines undergo rigorous testing and large clinical trials with diverse participants before they are approved for widespread use. Vaccination is the best protection to reduce the risk of severe illness due to COVID-19. Getting vaccinated may also protect others around you who have not yet received the vaccine. For more on vaccine safety, visit mass.gov/covidvaccinesafety

The vaccine is proven to be extremely effective, but it's important for all residents to practice prevention until they get both doses and their body builds immunity. While the vaccines have been shown to be effective in helping the person vaccinated not get seriously ill from COVID-19, they have not yet been proven to reduce that person's ability to transmit COVID-19 to others. Continue to social distance, wear a mask, avoid groups and stay home if you feel sick.

If you have any concerns about getting the vaccine due to a medical condition, please discuss these concerns with your primary care physician. For more information on COVID-19 vaccine safety visit www.mass.gov/COVIDVaccineSafety.
